## EDUCATION

**Shri Ramswaroop Memorial University**  
*B.Tech – Computer Science & Engineering*

**Lucknow, Uttar Pradesh**  
*Graduation Date: May 2027*

**National P.G. College**  
*Bachelors in Science (Mathematics, Statistics, Computer Science)*

**Lucknow, Uttar Pradesh**  
*Graduation Date: May 2024*

**Rani Laxmi Bai Memorial School**  
*Intermediate (CBSE)*

**Lucknow, Uttar Pradesh**  
*Graduation Date: Mar 2021*

## WORK EXPERIENCE

### VOIS-AICTE-Netflix-Data Analysis

**Virtual**

*Virtual Internship - Project*

*Sep 2025 - Nov 2025*

- Analyzed 5,800+ Netflix records using Python, Pandas, and Jupyter Notebook, investigating genre distribution, release patterns, and country-wise content trends to surface actionable insights.
- Processed raw data through null-value handling, categorical encoding, and structural normalization, improving dataset consistency and analysis readiness by 98%.
- Produced 15+ Matplotlib and Seaborn visualizations on top-rated genres and production country trends, increasing stakeholder insight clarity and delivering a comprehensive EDA report. ### MIRAI - Travel genuie

**Virtual**

*Virtual Internship - Project*

*Jul 2025 - Aug 2025*

- Devised an agentic AI travel assistant using n8n workflow automation and OpenAI API, orchestrating multi-node pipelines for personalized itinerary generation and reducing manual planning effort by 40%.
- Configured Gmail and Google Sheets automation nodes to parse user queries, trigger AI responses, and log sender data automatically, streamlining end-to-end communication workflows by 40%.
- Conducted structured manual testing across itinerary generation and destination recommendation scenarios, validating reliable query ensuring consistent automation performance throughout. GitHub Link: [DIVYANSH1610/travel-genie-n8n](https://github.com/DIVYANSH1610/travel-genie-n8n)

## PROJECT EXPERIENCE

### MOTOE GARAGE – AI POWERED CAR PLATFORM

**Lucknow, Uttar Pradesh**

*Lead-Developer*

*Mar 2026 - Apr 2026*

- Spearheaded a full-stack car intelligence platform using React (Vite), Django REST Framework, and SQLite, structuring 30+ car models through a JSON-driven REST API architecture and eliminating data retrieval complexity by 40%.
- Implemented session-based authentication with CSRF-protected APIs and launched an AI-powered Garage Assistant using Gemini API for conversational car comparisons and used-car recommendations, improving user decision accuracy by 35%.
- Engineered a responsive React.js frontend with dynamic routing and optimized API handling, deploying to production on Vercel and reducing CORS-related request failures by 30%. [GitHub](#) Link: [DIVYANSH1610/MotoE](https://github.com/DIVYANSH1610/MotoE), Live Link: <https://moto-e.vercel.app>

### RESQ-AI DISASTER PLATFORM

**Lucknow, Uttar Pradesh**

*Lead-Developer*

*Aug 2025 - Sep 2025*

- Initiated a full-stack disaster response platform using HTML, CSS, JavaScript, and Python, integrating Leaflet.js for real-time geolocation mapping and reducing rescue route-planning time by 25%.
- Introduced a Groq API-powered emergency chatbot delivering context-aware NLP-based crisis guidance, improving first-response information accessibility for affected users across disaster scenarios.
- Designed a dynamic, cross-device responsive frontend deployed on GitHub Pages, streamlining emergency UI navigation and achieving consistent uptime across all testing environments.
