Professional Summary

Full-Stack and AI/ML Engineer (B.Tech CSE, 2027) with a dual-degree background in Mathematics and Statistics. Shipped 4+ production-deployed applications across LLM-powered platforms, agentic AI pipelines, and real-time web systems. Proficient in React, Django, Python, LangChain, RAG Systems, and Generative AI APIs (Gemini, OpenAI, Groq). SIH 2025 award recipient, active freelance developer, and 100 Days of Code alumnus.

Technical Skills

Languages: Python, JavaScript, TypeScript, Java, SQL, C#

Frontend: React.js, Redux, Vite, Tailwind CSS, shadcn/ui, Leaflet.js, Framer Motion

Backend: Django REST Framework, Node.js, Firebase, REST APIs, Session Auth, CSRF Protection

AI / GenAI: LLMs, RAG Systems, LangChain, Multi-Agent Pipelines, Gemini API, OpenAI API, Groq API, n8n

Cloud & DevOps: AWS, GCP, IBM Cloud, Vercel, Docker, Git, GitHub, CI/CD, Postman

Data Science: Pandas, NumPy, Matplotlib, Seaborn, EDA, Jupyter Notebook

Projects

MotoE Garage — AI-Powered Car Intelligence Platform

Mar – Apr 2026

React · Vite · Django REST · Gemini API · Tailwind CSS · Vercel

Live ↗ | GitHub ↗

- Architected a full-stack platform serving **30+ car models** via JSON-driven REST API, cutting data retrieval complexity by **40%**; implemented CSRF-protected session auth, reducing unauthorized access risk by **90%** and CORS failures by **30%**.
- Integrated **Gemini API** to power an AI Garage Assistant and Used Car Advisor for natural-language comparisons, improving user decision accuracy by **35%**.

RESQ — Real-Time AI Disaster Response Platform [SIH 2025 — 3rd Place]

Aug – Sep 2025

React · Firebase · Groq API · Leaflet.js · Node.js · Google Maps

Live ↗ | GitHub ↗

- Built a production-grade disaster management system with real-time geolocation mapping and **AutoQ predictive evacuation routing**, reducing rescue route-planning time by **25%**.
- Deployed a **Groq API** NLP emergency chatbot delivering context-aware crisis guidance across multiple disaster scenarios with SOS alerts and real-time Q-link volunteer communication.
- Optimized API handling achieving **30% reduction in UI load time**; shipped a cross-device responsive frontend with **100% uptime** across all test environments.

Travel Genie (MIRAI) — Agentic AI Travel Assistant

Jul – Aug 2025

n8n · OpenAI API · Gmail API · Google Sheets

Live ↗ | GitHub ↗

- Engineered a **multi-agent AI workflow** orchestrating 5+ API nodes (OpenAI, Gmail, Google Sheets) for context-aware itinerary generation achieving **95% query accuracy**.
- Automated Gmail and Google Sheets nodes to parse queries, trigger AI responses, and log data — eliminating manual communication overhead and reducing workflow execution time by **40%**.

Fat2Fit by Eddeys — Freelance Commercial Website

2025

HTML5 · CSS3 · JavaScript · WhatsApp API

Live ↗

- Sole developer delivering end-to-end production website for a **paid client** (health and wellness brand) — from design brief to live deployment, featuring mobile-first responsive design and WhatsApp CTA for direct lead conversion.

Education

Shri Ramswaroop Memorial University

Expected May 2027

B.Tech, Computer Science & Engineering

National P.G. College, Lucknow

May 2024

B.Sc, Mathematics, Statistics & Computer Science (Dual Degree)

Work Experience

AI & Cloud Intern

Sep 2025 – Present

IBM via AICTE Platform

Virtual

- Developed AI-driven cloud solutions on IBM Cloud, building scalable deployments and intelligent analytics pipelines under IBM SkillsBuild AI & Cloud program.

AI Development Intern

Jul 2025 – Aug 2025

Mirai School of Technology

Virtual

- Designed and deployed **Travel Genie** — an agentic n8n + OpenAI production pipeline — reducing workflow execution time by **40%** and eliminating manual data-handling overhead.

Data Analysis Intern

Sep 2025 – Nov 2025

VOIS-AICTE, Vodafone Idea

Virtual

- Delivered end-to-end EDA on **5,800+ Netflix records** using Python and Pandas, achieving **98% dataset quality improvement** and producing 15+ actionable stakeholder visualizations.

Certifications & Achievements

- IBM AI & Cloud Technology Internship (2025) | IBM Front-End Web Development Internship (2025) | IBM Cloud Fundamentals Certified
- Conversational Data Analysis with LLMs — VOIS × AICTE (2025) | AI & Data Analytics: Green Skills — Shell × AICTE (2025)
- SIH 2025 — 3rd Place** at Smart India Hackathon campus round (20+ competing teams); HEAL: consent-based Aadhaar-linked digital health identity platform.
- LeetCode 100-Day Badge** (LeetCode ↗) — 100+ consecutive days of DSA practice (Arrays, DP, Graphs, Strings); **100 Days of Code** public challenge completed.
